Letter of Recommendation

I am pleased to recommend **ASHWIN YADHAV KUMAR** who is applying for the graduate program in your university. I have known him for the last three years as a student of our college when I taught him the subjects of "Advanced Data Structures" and "Database Management Systems" and also supervised his work in the corresponding Advanced Data Structures and Database Management Systems Lab.

Through my interaction with Ashwin I have found that he has an excellent grasping power and logical bent of mind. He is a hardworking and sincere student full of initiative and drive, and his academic performance duly reflects this. During the practical sessions I came to form a favorable opinion of Ashwin due to his good laboratory skills and capacity to practically implement theoretical knowledge.

He ranked among the top 5 in his class during the Bachelor's course and has maintained his consistence in all other fields. He is innovative and generally came up with intelligent questions that reflected his understanding of the subjects and quest for knowledge. He used to take the initiative in completing all his assignments within the given time. He regularly visited the library thus upgrading and adding to his technical abilities.

I sincerely believe that he deserves admission to your program to enable him to pursue higher studies. In view of his consistently good track record, his zeal for learning and his commitment to his goal, I strongly recommend Ashwin for admission as well as financial aid and also wish him the best for the future.

J. Sunanda
(Mrs. J. Sunanda)
