

LETTER OF RECOMMENDATION

Date: 08 – June- 2018

To whosoever it may concern.

I have had an immense pleasure to work with Mr. Ashwin Kumar Yadav at IBM India Private Limited from Nov – 2012 to Dec – 2013 in one of the teams for a service line in *Information Technology Systems* and *Active Directory Administration*. He was one of the brightest team member and a thorough professional I had come across.

During his short stint at IBM, Mr. Kumar had taken few initiatives in problem solving some of the critical technical issues that the business service line had encountered which not only provided the impetus to drive the solution but also proved that he had demonstrated true leadership skills. This is a rarity in my view as a comparative analysis of individuals of his age group personifying such an impeccable stature shows to prove that he was passionate about his work.

I strongly believe that Mr. Kumar would add value to any organization that he shall be associated as he has a great zeal towards learning new concepts, adapting to new conditions and making a great team player.

I wish him all the very best for his future endeavors and believe that he should be of great success not just to the organization but also to the society which he would be associated.

Kindly reach out to me for any future communication in the contact details outlined below, I shall be glad to provide you the required information regarding his conduct.

Sincerely,

Keerthan Gattu
