Letter of Recommendation

May this letter reach you as a recommendation for Ashwin Yadhav Kumar for the masters' program at your university.

Ashwin and I discussed his recent decision to pursue his master's at your esteemed university and I fully support his strong desire to upskill himself and pursue his journey towards something he is dedicated for.

I have worked with him for a while and during his tenure at Mindtree, he has come forward as being skilled at problem solving and great at communication. He has a strong personality and a backbone to distinguish between right and wrong.

While his decision ultimately comes with the consequence of him leaving the organization, which would be a loss for us, I am extremely confident that he will thrive in whichever field he chooses to pursue at your university. He is intelligent, diligent and an inquisitive individual, who I believe would be an extraordinary asset to your university.

Thank you for taking the time to read this letter.
